VYSHNAVI PENDELA

DATA ANALYST | BUSINESS ANALYST

Hyderabad, Telangana, India | vyshnavipendela7@gmail.com
https://www.linkedin.com/in/vyshnavi-pendela/ | https://github.com/Vyshnavi12548

PROFESSIONAL SUMMARY

Computer Science undergraduate graduating in 2027 with project experience in data cleaning, exploratory analysis, predictive modelling and business intelligence dashboards. Uses Python, SQL, Excel, Power BI and Tableau to organize information, explore patterns and communicate insights. Interested in Data Analyst, Business Analyst and BI Analyst opportunities.

TECHNICAL SKILLS

Data analysis: Data cleaning, data validation, exploratory data analysis (EDA), descriptive statistics, trend analysis, KPI reporting
Querying & spreadsheets: SQL, Microsoft Excel, PivotTables, lookup functions, data organization
BI & visualization: Power BI, DAX, Tableau, dashboard design, charts, filters and slicers
Programming & libraries: Python, Pandas, NumPy, Matplotlib, Seaborn, scikit-learn
Business skills: Problem framing, requirements understanding, insight communication, documentation

SELECTED PROJECTS

- **Agricultural Productivity Analysis | Power BI —** Created Power BI project work exploring agricultural data and presenting state-level information in dashboard views to support comparison and interpretation. (GitHub: Vyshnavi12548/PowerBI-projects)
- **Amazon Prime Video Content Dashboard | Power BI —** Developed a dashboard project to explore content distribution by genre, country and release patterns using the Amazon Prime titles dataset. (GitHub: Vyshnavi12548/Amazon_dashboard)
- **EV Data Analysis | Python, Pandas —** Worked with raw and cleaned electric-vehicle datasets, applying preprocessing and exploratory analysis to examine vehicle attributes and market patterns. Repository also contains an early EV chatbot prototype. (GitHub: Vyshnavi12548/EV-Week-1)
- **Employee Salary Prediction | Python, Machine Learning —** Completed notebook-based predictive modelling practice through an IBM / Edunet learning project, using employee-related data and machine-learning workflows. (GitHub: Vyshnavi12548/IBM_ESP)
- **Flux Flow - Customer Churn MVP | Python, scikit-learn, Flask —** Project MVP using simulated customer data, a Logistic Regression pipeline and a web interface to show churn-risk classification and probability. (GitHub: Vyshnavi12548/AI-Powered-Customer-Retention-for-E-commerce-SMEs)

EXPERIENCE & PROGRAMMES

- **Edunet Foundation | Data Analytics / AI Internship Programme —** Remote project-based learning in AI and data analytics, including Python, dashboard and analytical project work.
- **Deloitte & Tata | Forage Job Simulations —** Completed virtual job-simulation learning involving data analytics and data visualization tasks.

EDUCATION

B.Tech, Computer Science and Engineering | TKR College of Engineering and Technology | Expected 2027 | CGPA: 8.16/10

SELECTED CERTIFICATIONS & LEARNING

Oracle Cloud Infrastructure - Data Science Professional | Google Analytics Certification | IBM - Python for Data Science | Tata - Data Visualization Job Simulation (Forage) | Deloitte - Data Analytics Job Simulation (Forage) | Google Cloud Skill Badges - Prepare Data for ML APIs; Prompt Design in Vertex AI

Project and programme descriptions reflect documented repositories and previously shared experience.
