VYSHNAVI PENDELA

PRODUCT MANAGEMENT | AI PRODUCT

Hyderabad, Telangana, India | vyshnavipendela7@gmail.com
https://www.linkedin.com/in/vyshnavi-pendela/ | https://github.com/Vyshnavi12548

PROFESSIONAL SUMMARY

Computer Science undergraduate graduating in 2027 with self-directed product case-study experience across AI-enabled learning, voice experiences and consumer app discovery. Practices problem framing, user journeys, PRD writing, feature prioritization, RICE scoring and A/B testing concepts, supported by a foundation in Python, SQL, analytics and interface design. Interested in Product Analyst, Associate Product Manager and AI Product Intern roles.

TECHNICAL SKILLS

Product management: Problem discovery, user needs, product requirements documents (PRDs), feature definition, prioritization, roadmap thinking, product metrics
Research & experimentation: User journey mapping, user stories, RICE prioritization, A/B testing concepts, feedback analysis, hypothesis framing
Design & collaboration: Figma, wireframing, UX review, requirements documentation, stakeholder communication
Data & technology: SQL, Python, Excel, Power BI, analytics, AI/ML fundamentals, NLP, API concepts

SELECTED PROJECTS

- **Vidyabot 2.0 - Language-Agnostic Learning Companion | AI Product Case —** Product direction for an accessible educational assistant focused on regional-language learning support. Explored a learning companion experience, voice interaction, inclusive language coverage and reminder-oriented features. (GitHub: Vyshnavi12548/vidyabot)
- **Spotify - Mood & Situation-Based Discovery | Product Redesign —** Created a product redesign case introducing mood and situation filters such as happy, sad, feel-good and workout to reduce friction in music discovery. Case study and design material are stored in the earlier portfolio repository. (GitHub: Vyshnavi12548/portfolio)
- **Zomato - Discover Places Through Dishes | Product Concept —** Proposed a dish-first discovery experience with dish detail pages, an interactive food map and curated culinary trails. Concept-stage work; outcome metrics have not been claimed.
- **Saahayika - AI Voice Companion | Product Exploration —** Explored a voice-first, Telugu-English companion experience for Indian homemakers, with a focus on accessible interaction and supportive everyday conversations. (GitHub: Vyshnavi12548/Saahayika)

EXPERIENCE & PROGRAMMES

- **Independent Product Management Practice —** Built self-directed case studies and exercises covering PRDs, user journeys, product prioritization, feature trade-offs, A/B testing concepts and redesign rationale.
- **Edunet Foundation | Data Analytics / AI Internship Programme —** Remote project-based learning in AI and analytics, providing a technical foundation for data-informed product decisions.

EDUCATION

B.Tech, Computer Science and Engineering | TKR College of Engineering and Technology | Expected 2027 | CGPA: 8.16/10

SELECTED CERTIFICATIONS & LEARNING

Pendo - AI for Product Management | IBM - Enterprise Design Thinking Practitioner | Google Analytics Certification | Salesforce - Agentforce Specialist | Oracle - AI Foundations Associate | IBM SkillsBuild - Artificial Intelligence Fundamentals with Capstone
